

JOB DESCRIPTION

QA/QC Technician

Dunn Utility Products, a Byram, MS-based concrete pipe and precast producer, is seeking an experienced QA/QC Technician. This position reports to the Production/QC Manager.

MAJOR RESPONSIBILITIES

- Work toward all certifications required to perform the job as QC.
- Completion of the following certifications: ACI level I Field Testing, ACI Strength, PQS.
- Complete all required paperwork and records are being properly filled out and maintained and all daily, weekly, and monthly testing is performed.
- Help to continue to cultivate/grow relationships with all DOTs.
- Work with management on a training program to continuously train plant personnel on proper techniques and processes to ensure we are producing a high-quality product.
- Ensure all pre-pour and post-inspections are done daily. Ensure all products are stamped and labeled properly before being yarded. Instruct plant personnel on proper repair procedures.
- Weekly yard walkthrough performed on the wet cast and pipe yard by QC. Damaged items must be immediately addressed.
- Send cull/production verification reports for each plant and ensure they are filled out and turned in daily.
- Help ensure all certifications stay up to date (plant, lab equipment).
- Daily strength testing of concrete pipe and cylinders.
- Inspection of all outgoing loads to verify accuracy.
- Other duties or special projects as assigned by management.

CROSS TRAINING CAPABILITIES

- Production Scheduling, Production Entry, Inventory, ACI III

Applicants need to have good interpersonal skills and be well organized. Dunn Utility Products offers competitive pay, health insurance, dental insurance, life insurance, paid vacation & holidays, and a 401k plan with a company match. Interested individuals can apply online at dunnutility.com/careers or call 601-487-2997.
